# New Technology Offers Contractors Inspection Solution

The Home Builders Association of Gaston County understands the tremendous pressure construction professionals face each day to finish their projects on time and under budget. This is why Gaston County HBA has formed a new partnership with MobileHWY to provide area builders and contractors with an online inspection management system.

This new system will give builders and contractors the freedom to manage and perform all of their inspection needs on the internet with a computer or mobile phone. Through this one integrated system, contractors are able to link directly to the inspection systems of Gaston County, City of Gastonia, City of Rock Hill, Charlotte/Mecklenburg, Iredell, and Cabarrus County.

"With Mobile CONTRACTOR™, we have better communication between operation personnel, field staff and sub-contractors, which has improved our productivity and lowered our operational costs," said Marc Austin, Director of Field Operations, Ryland Homes.

We are happy to announce that Mobile CONTRACTOR™ will be coming to Gaston County in August.
